Hiring Manager

Subject: Application for Software Engineer Position

Dear Hiring Manager,

I am writing to express my interest in software engineering opportunities within your organization.

As a Software Engineer at Lumyn Labs, I have architected web applications, designed communication protocols, and maintained CI/CD systems across multiple languages. Additionally, as an Assistant Coach for FIRST Robotics, I mentor students in agile development and software engineering best practices, reinforcing my technical leadership and communication skills.

My background combines hands-on technical expertise with the ability to lead and mentor teams. I am passionate about building robust, scalable software solutions and am eager to bring my skills in C++, Java, Python, and modern web technologies to a new challenge.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience and passion for software engineering can contribute to your team.

Sincerely,

Levi Belland
